目录

1 Main Header

```python
1  @bottle.route('/'):
2  def blog_index():
3      cookie = bottle.request.get_cookie("session")
4      username = sessions.get_username(cookie)
5
6      if not username:
7          username = "Unknown"
8      # snip
9
10     return bottle.template('blog_template', dict(username=username))
```

we retrieve the username at line 4
